

\$25 Be Rewarded™ Mammogram

Getting regular mammograms is an important part of your ongoing health care. If you are between ages 40 and older, or your doctor recommends it, you should have a mammogram, even if you are in good health.

Early detection is key

A mammogram is an X-ray of your breast that can detect early signs of breast cancer. Women do not always feel the symptoms of breast cancer, so it is important to get a mammogram. Talk with your provider about your risk for breast cancer.
